

VARIPHONE

● V-SIL

Despite the fact that acrylic hearing protectors offer a lot of advantages, some users may require the use of a softer material such as silicon. For those clients who prefer a silicon product Ear-O-Tec is able to offer the V-SIL. This custom made hearing protector, manufactured from a 50 Shore silicone material, is marked by its quality design and wearing comfort.

V-Sil is available in transparent or blue silicon and can be provided with a cord. The hearing protector is provided with a selective filter. Variphone Benelux offers a large choice of very stable metal "laser calibrated ST-filters" which guarantee their efficiency. Our qualified technicians will assist you in making the choice of an appropriate filter to guarantee the correct amount of protection needed.
